- Repair and maintain mechanical/hydraulic/pneumatic equipment.
- Attend field breakdown on Land and/or Marine site.
- Work on Field based workshops on Front Line Equipment.
- Carry out repairs and overhauls to high standard.
- Plan rebuilds and scheduled maintenance.
- Adhere to Austral HSE standard and procedures.

To be considered for the position you must have:

- Trade Qualifications for Hydraulic Fluid Power or Plant Maintenance with in-depth Hydraulic experience.
- Proven post trade experience of 5 years minimum
- A high level of maintenance fitting skills including installation, and repairs.
- Excellent problem-solving skills, particularly in hydraulic and pneumatic systems.
- Very high attention to detail and quality with a safety focused mindset.
- Excellent communication to ensure the decision-making processes is in alignment with our mission statement and core values.
- In-depth understanding of mechanical/hydraulic/pneumatic diagnosis and repair. Including drawing interpretation and application.
- Self-Motivated and Driven individual
- Current driver's licence, preferably including HR.

Desirable but not essential

- Experience in Piling Rigs and Marine Equipment
- Experience of Cranes and lifting equipment
- Rigging, Dogging, Forklift and Crane tickets
- Industrial White Card

What we are offering:

- Permanent Mechanical/Hydraulic Tradesman – Based in our Port Hedland Workshop or Project Site based.
- Competitive remuneration package
- Opportunities for growth and progression

If you are a proactive person with a strong company focus, take pride and ownership in your contribution, have good attention to detail and want to be part of a growing organisation this could be your next long-term role.
